Jun 26, 2018 Smoking crack is a strong habit-forming process that involves multiple preparation steps before taking the hit.. Same way as tweak or weed ech0s85people smoke weed from lightbulbs? Ive hit crack out of a regular pipe before it had a tiny hole so it didnt run through right away but even after it did we just sucked the flame into the bowl and got bomb hits.. Georgie25I got some crack i want to smoke soon but no access to the typical crackpipe.. poke a hole in the bottom of the can, or the side for a carb get the ash from a cig.

Load up and meet your daily recommended fruit serving An apple pipe a day keeps the doctor away is how the saying.. scratch off the silk-screened label, about the size of a quarter in the dent poke tiny holes, about 8-10 where you scratched.. PrismedIf you use a can make sure to put a carb on the side You'll get some monster hits smoking it this wayGeorgie25I dont understand, I wanna do the can method but where do I get ash from? And do I just get a can and put a dent in it and poke holes n put the crack on the hole and light up? Some of the peices in this bag i have are pretty small might fall in? Any step by step instructions for making 1?Thanks ?3DayRun

don't forget that you can use a lightbulb, too!lyrrad85zdent the top. [Mac Store Prices](#)

How else can I smoke this effectively?----PrismedYou can make pipe out of tinfoil and put some ash on the bottom and then put the rocks on top Or you can make a pipe out of an aluminum can and do the same thing Happy Smoking ?lyrrad85ztin foil gets too hot, plus cans are more plentiful, use a can but dont make the holes too big.. but i likeusing cans when i have nothing else lolNibI dont have any cigs or weed etc, do I NEED the ash?There's a lot of other material that creates ash when burnt.. Heighton720cans are a good way you can get HUGE hits this way BUT it also wastes some of the rock.. Some of the heroin and crack cocaine sticks to the inside of the pipe during smoking and this residue can subsequently be smoked.. hit that shit hard with the flame on the whole time and hold it till you cain't no more.. For many drug users this is a positive benefit – prolonging the drug using experience and providing an 'extra' supply of the drug at the end of a session.. let it burn and flick it right on your holes gently, GENTLY, pack the ash and place your butter on top.. Georgie25How do I use a lightbulb? Same way as vaping weed? Or do i not "vape it"?Georgie25I dont have any cigs or weed etc, do I NEED the ash?3DayRunYeah, you're basically vaping it. b0d43de27c [Toolkit For Mac](#)
