It is recommended to use aluminum bronze for backing (self-seating see opposite page) up to 3000 F.P.M. For speed above 3000 F.P.M. tungsten carbide is recommended. For side guides, aluminum bronze is used with excellent results up to 15,000 F.P.M., especially where precision guiding is required. For diamond cutting use aluminum bronze backing with Delrin side guides.

SINGLE PIECE GUIDES

are simple and quickly changed. They are obtainable in either hard bronze or tungsten carbide.

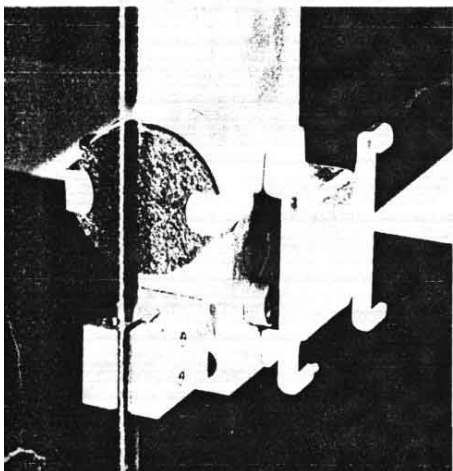

THREE PIECE GUIDES

allow adjustment for various blade positions and thickness. They permit different materials for rear and side guides.

Grob Machines Are Not Limited To Any Type Of Saw Blades. Saw Blades Are Supplied By The Many Good Manufacturers — Their Agents And Mill Supply Houses.
